

Network Mapping
FAKULTAS EKONOMI BISNIS (FEB)
UNIVERSITAS JEMBER

The diagram illustrates a complex network topology for the Faculty of Business Economics (FEB) at Jember University. The network is centered around a core switch (SW. Manage Huawei S5700 Dekanat) and a router (Router CCR2004 R. Server Dekanat). The core switch is connected to various access points (APs), switches, and servers. The router is connected to the core switch and provides internet access. The network is divided into several segments, including a server lab, a library, and various classrooms. The diagram shows the physical connections between devices, including Ethernet cables and fiber optic links. The network is designed to provide reliable and secure communication for the faculty's operations.
